

# Bhumi Patel

Front End Developer

**Phone** (631) 355-5260

**Email** bhumipatel023@gmail.com

**Address** Strongsville, Ohio 44149

## PROFESSIONAL SUMMARY

- Adaptable professional with over 8 years of work experience and proven knowledge of leadership, problem-solving, and prioritization. Aiming to leverage my abilities to successfully fill the Frontend Developer role at your company.
- Accomplished professional with expertise in planning, designing, and implementing high-quality, high-profile websites. Skilled in HTML, CSS, JavaScript, Drupal and WordPress development and configuration. Proven ability to quickly understand requirements, create innovative solutions, and complete projects within tight deadlines.
- Strong analytical skills and very adept at resolving problems and addressing issues with creative solutions.
- Hardworking, highly motivated professional eager to lend combined knowledge and skills to enhance business performance. Operates well in both individual and team capacities, leveraging seasoned work ethic to quickly adapt to different processes and drive company objectives. Resourceful and results-driven with a passion for growth and efficiency to meet company needs and increase service value.
- Enjoy learning new tools and technologies needed. Flexible to adapt to any environment and able to work on any project.
- Worked with the QA team and junior developers in fixing bugs and confirming cross browser compatibility and search engine optimization (SEO). Well-versed with WCAG Accessibility Guidelines and screen reader testing.

## SKILLS

- Front-End Programming: HTML5, CSS3, AJAX
- Responsive Web Design
- JS Libraries & Frameworks: jQuery, Bootstrap
- Jira, Confluence and ClickUp
- Cross-Browser Compatibility
- Node.js Basics
- Angular.js Knowledge
- WCAG Accessibility Testing and Development
- Web Components Development
- Technical Documentation
- Solution Architecture and Project Scoping
- Attention to Detail and Problem solving
- JavaScript Libraries and Frameworks
- SASS Development, Gulp / Webpack setup
- Version Control Systems: Git, GitHub
- RESTful API
- SEO best practices and testing
- Vue.js knowledge
- React.js Experience
- Bootstrap Framework
- Mobile-First Approach
- Drupal 7/8/9/10 theming experience
- WordPress theming experience
- Interactive Infographics and Charts

## EXPERIENCE

---

### FRONTEND WEB DEVELOPER – Millennium Communications

Syosset, NY, *January 2019 - March 2024*

- Developed web experiences for a small-business agency with esteemed clients such as JPMorgan Chase, US Open, Ritz Carlton, Thomas' English Muffins, Entenmann's, Little Bites, Takis, Arnold Bread, Boboli, and more.
- Established coding conventions that improved readability of code base by other developers on the team.
- Built custom Drupal and WordPress themes from scratch utilizing the latest industry standards of coding practices. Perform CMS upgrades from Drupal 7 to Drupal 9/10.
- Participated in Waterfall and Agile development methodologies including daily standups, retrospectives.
- Used version control systems such as Git to manage code repositories and track changes.
- Optimized web applications for performance using techniques like minification and caching, testing with automated tools such as Screaming Frog or Google PageSpeed Insights.
- Worked closely with UX and UI designers to ensure that designs are implemented correctly in the browser.
- Analyzed analytics tools such Google Analytics to measure website performance metrics.
- Collaborated with back-end developers to integrate server-side logic into the UI layer.
- Created interactive e-Learning user interfaces with React.js.
- Implemented efficient AJAX requests for data retrieval from APIs.
- Designed user experiences on mobile devices through media queries and responsive design principles.
- Tested websites across multiple browsers, platforms, and devices for ensured compatibility.
- Integrated third-party libraries to enhance application features and functionality. Worked with libraries such as HighCharts, HighMaps, and custom JavaScript to create interactive infographics.
- Debugged cross-browser compatibility issues in Chrome, Firefox, Safari, and IE/Edge.
- Resolved complex coding problems related to client-side scripting languages like JavaScript and jQuery.
- Developed engaging and responsive, mobile-first websites with interactivity, animations, and infographics. Utilized task runners such as Grunt or Gulp to automate front end build processes efficiently.
- Learned new front-end programming languages and methodologies to perform tasks.
- Created technical requirements and worked with engineering team to develop, test, and launch functionality on time and with high quality.
- Translated design files from Sketch, Figma, Adobe XD or Photoshop to clean, accessible and interactive user experiences.
- Created prototypes of new applications or features to demonstrate potential functionality to stakeholders.
- Liaised with internal teams to collect and analyze product requirements.
- Optimized web applications for maximum speed and scalability, testing with PageSpeed and Screaming Frog.
- Documented requirement specifications to formalize into features and user stories.
- Performed or directed and smoke-tested CMS core and plugin/module updates.
- Documented test plans, testing procedures, or test results.
- Analyzed user needs to determine technical requirements.
- Developed and implemented procedures for ongoing Web site content management.

## **WEB DEVELOPER – Henry Schein Inc.**

Melville, NY, May 2016 - November 2018

- Developed custom websites to meet individual client needs.
- Created clean, well-documented custom code and updates.
- Leveraged mastery of HTML, CSS, and JavaScript to build top-quality code for diverse projects.
- Performed cross-browser testing to ensure compatibility across multiple platforms and devices.
- Create / Expand creative and live code style guide using HTML / CSS / JS
- Redesign existing part of the website as well as created new webpages.
- Helped create RESTFUL architecture for web features.
- Involved in developing the UI pages using HTML5, CSS3, JavaScript, JSON, jQuery, Ajax  
Work with management, engineers, and other members of cross functional teams to refine and implement.
- designs and user interfaces into a final product.
- Used AJAX and JSON to make asynchronous calls to the project server to fetch the attendance record.
- Continually explore new technology and be the voice of best practices related to user experience design.
- Handled browser compatibility issues for different browsers related to CSS, HTML and JavaScript for IE, Firefox, and Chrome browsers.
- Develop UI specifications including conceptual designs, site maps, user task flows.
- Establish, implement, and maintain consistent branding standards across multiple web and mobile applications and non-application projects.
- Executing UI / UX design as a part of a multi-disciplinary team
- Collaborating on user experience planning with the product team
- Implemented highly interactive features and redesigned some parts of products by writing plain JavaScript due to some compatibility issues using jQuery.

## **FRONT-END DEVELOPER – WebMD**

August 2014 - March 2016

- Worked on multiple sections of multiple websites.
- Maintained existing webpages/modules, created new webpages and well as redesigned some of the parts of the websites.
- Analyzed requirement to translate functional requirements into technical requirements using MVC framework Angular.js.
- Worked in an environment where multiple developers worked on separate modules simultaneously.
- Designed front-end applications, user interactive (UI) web pages using web technologies like HTML, XHTML, CSS, AngularJS, and Bootstrap.
- Used various jQuery plugins in the UI to display the content and manage navigations.
- Responsible for the overall layout design, created a responsive webpage and implemented dynamic features by using Twitter Bootstrap.

- Implemented highly interactive features and redesigned some parts of products by writing plain JavaScript due to some compatibility issues using jQuery.
- Used Angular UI for dialogs, tabs, date pickers and auto-complete features.
- Designed and developed modules to retrieve data and improve data using AJAX calls by \$http service in AngularJS.
- Implemented AJAX in web pages for accessing application data without refreshing the whole pages for better user experience.
- Utilized version control tool GIT to work on the same codebase in the repository with the other team members.
- Worked with the Quality Assurance team in fixing the defects.

## **EDUCATION** .....

### **BACHELOR OF SCIENCE (B.S.) IN COMPUTER ENGINEERING**

— **Gujarat Technological University**

India, *May 2014*
